## Spring Gardening Class Schedule

*Free classes held in our indoor classroom at J&L*

*Many Coupons and Special Prices are available to those who attend our gardening classes.*

### Saturday March 6

#### Pruning Guidelines 9:00 am - 11:00 am

**Gary Smith** will teach the pruning classes. Pruning is one of the most important tasks in the garden, especially in the spring. Learn a few of the basics and it may help you understand why you remove more branches from a peach tree than from an apple tree.

#### Deer Repelling Options- 1:00pm

**Jay Barber.** Deer are a real problem. Come and learn about a few of the many Deer and Animal Repellents available.

### Saturday March 13

#### Pruning Guidelines 9:00 am - 11:00 am

Pruning is one of the most important tasks in the garden, especially in the spring. Learn a few of the basics and it may help you understand why you prune some plants in the summer instead of in the spring this year.

#### Native and Waterwise Plants - 1:00 pm

**Garth Goodrich.** Mother Nature has provided many plants that have very desirable growth habits and grow well in Davis County. Learn about a few of them, and how to best use them in your landscape.

### Saturday March 20

#### Pruning Guidelines 9:00 am - 11:00 am

Pruning is one of the most important tasks in the garden, especially in the spring. Learn a few of the basics and it may help you understand why you should wait to prune roses, lilacs, flowering cherries, and quince until later this spring.

#### Vegetable Gardening From Start to Finish - 1:00 pm to 3 pm

**Jaydee Gunnell - USU Extension Agent** will discuss how to build, plant and take care of Vegetable Gardens. He will also discuss raised bed gardening and organic options for insect and Disease controls.

### Saturday March 27

#### Pruning Guidelines 9:00 am - 11:00 am

Pruning is one of the most important tasks in the garden, especially in the spring. Learn a few of the basics and it may help you understand why you do not prune pine trees the same way you prune shade trees.

#### Square Foot Gardening - 1:00 pm

**Pat Westaway** Square foot gardening has become a very popular way to garden in small spaces. Learn the basics and start gardening in square places in your yard.

### Saturday April 3

#### Gardening For Kids 9:00 am

**Annette Ward** There are many gardening activities that children can enjoy. We will teach your children a few fun things to do in your garden. Designed for 8 to 12 year old children.

#### Pond Care 1:00 pm

**Albert Smith** will teach and show you how to take care of your pond. He will teach you about pond fish, pond plants, and more.

### Saturday April 10

#### Fertilizers - How, When, Why, and What to Use 9:00 am - 11:00 am

**Shawn Olsen - USU Extension Agent** will discuss how to choose a fertilizer, when to apply it, and why there are so many different types available.

#### Herb Gardening 1:00 pm

Herbs are easy to grow and can provide many benefits to your yard; enhance the flavor of your meals, add color and fragrance to your gardens, repel many unwanted insects and pests.

### Saturday April 17

#### Pond Care 9:00 am

**Albert Smith** will teach and show you how to take care of your pond. He will teach you about pond fish, pond plants, and more.

#### Gardening with Children 1:00 pm

**Annette Ward** There are many gardening activities that children can enjoy. We will teach your children a few fun things to do in your garden. Designed for 8 to 12 year old children.

### Saturday April 24

#### Square Foot Gardening 10:00 am

**Pat Westaway.** Square foot gardening has become a very popular way to garden in small spaces. Learn the basics and start gardening in square places in your yard.

#### Container Gardening Class 1:00 pm

**Debbie West.** Learn the secrets about how to create and maintain unique, Eye Catching Gardens planted in Containers. We will discuss wire baskets, Hanging Baskets, Patio Planters, and 'Bloom Master' Containers.
